

Verio FreeBSD Managed Private Server (MPS) v2 from MarketWorks, LLC

Your business demands more than a server.

If your business relies on secure, reliable, high-performance servers to power customer transactions, a rack of hardware alone probably won't deliver the peace of mind you need. This makes your server strategy somewhat simple.

The solution that covers your server needs from every angle.

Serious power—You'll be equipped with a hardware and software configuration ideally suited to meet the traffic and performance demands of your sites and services.

Complete confidence—Verio's team of Internet experts delivers the full slate of system administration and management services, including security, backup, monitoring, and maintenance. Leave the IT to us, so you can stay focused on your customers' needs.

Growing room—FreeBSD Managed Private Server v2 accounts offer great flexibility. A tiered solution set allows you to select the plan that best satisfies your budget and requirements. No limits on scalability makes it easy to grow as you go.

MPS solutions provide the resources you need:

- Extensive system administration
- Data backup and monitoring
- Managed Security
- Server software with managed OS
- Certified enterprise-class server hardware
- Core IP services (Shell, HTTP, FTP and Mail)
- Application add-ons (e-commerce, databases, multimedia, statistics packages, cgi-library, development suites and more)

The highest level of service.

The MPS v2 solution delivers enterprise-class servers and software to power the most intensive sites and applications with dedicated bandwidth and processing. And then we dedicate a team of experts to ensure your services run smooth 24/7—while lowering your costs. You can forget about investing in equipment and personnel for managing patches, upgrades, and various other technicalities. Instead, you leave everything to Verio, the experts.

A secure choice.

Our state-of-the-art, hardened, climate-controlled data centers deliver supreme availability, security, and system redundancy.

The facilities feature:

- » **Uninterruptible power**
- » **Environmental management and fire suppression systems**
- » **On-site control center offers monitoring 24x7x365**
- » **Network monitoring from our global customer operations center**
