

Verio Shared Hosting for Unix from MarketWorks, LLC

The innovator of virtual private server (VPS) technology, Verio helped shape Web hosting and Internet Protocol (IP) services. Today our solutions include a portfolio of highly affordable Unix -based hosting solutions that offer “Business Onlinement”.

[Our plans are built to help you succeed online.](#)

Our robust hosting plans feature numerous tools to help you realize even more from a small investment in Web services.

- » **EasySite Website Builder**—EasySite Website Builder makes Web design quick and easy — and free. In minutes, you can create home pages with standard features, photo albums, Flash animation, feedback forms and more. There is no software to download and no programming language to learn.
- » **Podcasting capability**—You can distribute audio and video content and automatically notify your Website subscribers about the availability of new content via RSS readers. Adding podcasting to your media mix is an exciting way to distribute news about product promotions and a wide variety of topics and interests to customers and prospects.
- » **Blogging tools**—A free blogging tool makes it easy for you to create and manage blogs to connect with customers and site visitors and build loyalty.

Powerful email options

- Configurable POP email accounts with mail forward and auto-responders
- Spam filtering, virus scanning, whitelisting, blacklisting and domain blocking
- Web mail lets you send and receive your email from your Web browser
- FreeBSD® /Apache Web server
- Microsoft® FrontPage 2003 Server extensions
- Search engine tools
- Web hosting services (podcasts, SSL security, blogs, counter, site search, message board, photo gallery, map etc)

- » **Domain name registration**—When you agree to begin a Shared Hosting for Unix plan, your domain name registration will be free for one year.
- » **Marketing tools**—To help you attract prospects to your site, Verio provides a wide array of free marketing tools for search engine optimization, advertising and analysis.
- » **Setup**—Its free to try Verio Shared Hosting for Unix from MarketWorks, LLC for 30 — and there’s no charge for your setup or your domain name.
- » **E-commerce**—We offer ShopSite, the easiest-to-use shopping cart software for running an online store. Prebuilt templates make it simple to add e-commerce functionality to your site.

Delivering guaranteed stability.

- » **Security**—A Unix kernel enforces “virtual walls” so that users are protected from security threats that might come from other users of the shared server. Your files are completely invisible to those with whom you share server space.
- » **Resource Management**—The same FairShare® technology Verio provides with its high-end private servers is used to ensure problematic sites on the same server won’t impact your sites performance.
- » **Simple controls**—A Web-based control panel makes account management and site development quick and easy.
- » **Ongoing maintenance**—We provide ongoing security updates, operating system updates, easy application installers, backup and recovery, and 24/7 maintenance - included in the low monthly price.
- » **Open source technology**—The solution is based on the FreeBSD® operating system, so you can benefit from the innovation of open source technology and the stability of a proven enterprise-class platform.
