

## Verio FreeBSD Virtual Private Server (VPS) from MarketWorks, LLC

### Affordable server plans to suit your needs.

You don't have to add IT staff or equipment when you want to expand the functionality and performance of your domain. Virtual Private Servers (VPS) provide an ideal solution that delivers the combination of control, flexibility, and affordability you need.

### VPS innovation.

Our innovative VPS solutions deliver stability and performance — as well as the proven security of the FreeBSD® 6.X operating system.

- » **Virtual power** – With VPS, your hardware is shared, but your software is dedicated. So you get root access, flexible control over your applications, and consistent performance.
- » **Expert management** – Our team of Internet experts takes care of your VPS, managing the hardware, core software applications, and connectivity so you can remain focused on your business.
- » **Low applications costs** – A variety of free off-the-shelf applications, including the entire FreeBSD ports collection, help lower your software costs.
- » **Upgrade path** – We offer a tiered line of hosting solutions at numerous price points to give you a smooth upgrade path and unlimited scalability.
- » **Enable IPv6 technology** – Develop your own IPv6 products or services, such as mobile devices, secure messaging, and Web applications.

### Full-featured server solutions.

- » **Increased Storage** – VPS plans include 10 GB, 20 GB, 40 GB, and 60 GB options.

- » **Operating System Updates** – FreeBSD 6.X delivers a robust system scheduler, threading support, and support for many applications including the latest Java implementations and the FreeBSD packages library.

- » **Updated File System** – Unix File System 2 delivers speed, performance, and stability.

### Virtual Private Servers. Real Applications.

Our VPS solutions provide the resources you need to:

- Host an e-commerce domain
- Support a corporate intranet
- Build a custom development environment
- Run Web-based calendaring
- Run multimedia applications (video streaming)
- Function as an email or chat server
- Create a customer support tracking system
- Host multiple domain names

- » **Web Development Tools** – Apache 2.x is installed as the default Web server, providing an ideal environment for Web developers. The flexible server solution allows you to extend functionality with e-commerce, databases, and additional applications. A wide variety of useful add-on software is also available.

- » **World-Class Connectivity** – When you power your applications with our VPS solution, you get the peace of mind that comes with knowing your domains and applications are running in state-of-the-art data centers with ultra-fast Web connections through a global Tier-1 network.
